

The Federal Communications Commission

Dear The Federal Communications Commission,

I do not want to pay more for my telephone service! As far as I'm concerned I already pay a ridiculous amount in taxes and fees (over \$10 a month) for basic monthly service I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my Tracfone, which I use mostly for security reasons since I also have a land-line, unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety and security reasons and already pay an excessive amount of fees to use by land line phone. I don't want to lose the benefits of my Tracfone so that big businesses or other large users can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee, it should continue to be based on amount of use.

Keep the USF Fair!

Sincerely,

Linda Kokemuller
